### ► Humanitarian Accountability

#### Enhancing the humanitarian impact of air services

Photo: ASF-B © Xavier Vincke

Building Project Management tools to measure the efficiency, quality and performance of air services on the basis of genuine humanitarian standards.

Pioneering the introduction of a Humanitarian Quality System into the humanitarian air transport sector driven by commercial airline quality systems.

Enhancing the impact of air transport projects on the capability of NGO to deliver relief aid with efficiency.

### ► Corporate Social Responsibility

#### Being the gateway of aviation CSR to the aid sector

ASF is a special meeting point, a place for sharing, a workshop forging common values between the aviation industry and the humanitarian community.

ASF is setting up the most cost effective responses to disasters with partnerships inspired by the Corporate Social Responsibility of the whole aviation industry.

ASF guarantees the humanitarian accountability of CSR inspired projects and partnerships with the aid sector.
